

# ULTRA 5000

Single Hung  
and Slider

HOW CAN  
WINDOWS  
THIS RUGGED  
LOOK THIS  
GOOD?

# ULTRA WINDOW DESIGNS DON'T FORCE YOU TO COMPROMISE BETWEEN PERFORMANCE AND GOOD LOOKS.

For years, people had to sacrifice durability to get windows that looked good. No more. Ultra single-hung and single-slider window designs have clean and simple lines that make them a pleasure to look at, yet they have all the quality features needed to stand the test of time.

The Ultra has our famous fusion-welded frame and sash corners, a feature recognized by experts as superior to mechanically fastened corners. Welded corners not only add strength (up to 33% more than many mechanical designs), but they provide a

permanent seal against air and water penetration, and they eliminate the need for unsightly caulk.

The Ultra has a smooth finish that keeps its new appearance longer, thanks to superior vinyl compounds used in all Ultra window designs. Add years of experience, and you have a window that's maintenance-free, energy-efficient, and cost effective.

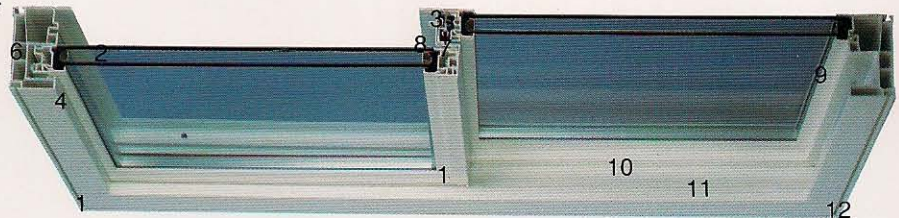

The Ultra is available for replacement and prime installations, multiple lite combinations, and with vinyl trim accessories such as brick mold, sill, and extension jambs.

## ULTRA SINGLE-HUNG & SLIDER DESIGN

1. Welded frame and sash corners provide strength and protection against air and water penetration.
2. 3/4" (19mm) glazing for improved U values and thermal efficiency.
3. Screw bosses and reinforcement for secure attachment of the transom/mullion.
4. Interior glazing bead allows for replacement of glass from the inside.
5. Latches allow sash to tilt in on single-hung windows for glass cleaning.
6. Screw bosses and second walls for secure hardware attachment.
7. Positive interlock and weatherstripping at the meeting rail reduce air infiltration.
8. Screen channel designed for interior screen removal.
9. Glazing tape for top and bottom glass increases structural strength.
10. Lift-out sash on slider for glass cleaning.
11. Tandem rollers on slider for smooth sash operation.
12. 3-1/4" (82.5mm) frame depth - ideal for easy replacement applications.
